Hello World!!

The screenshot shows the Chrome DevTools Network tab. The top toolbar includes buttons for Elements, Console, Sources, Network (selected), Performance, Memory, and a search icon. Below the toolbar, there are checkboxes for 'Preserve log' and 'Disable cache', and a dropdown menu set to 'No throttling'. A filter bar is present with the text 'Filter'. Below the filter bar, there are tabs for different resource types: All, Fetch/XHR, Doc, CSS, JS, Font, Img, Media, Manifest, Socket, Wasm, and Other. The main area displays a list of network requests. The first request, 'hello', is selected and expanded, showing its details in the right-hand pane. The details pane has tabs for Headers, Preview, Response, Initiator, and Timing. The 'Headers' tab is active, showing the 'General' section with the following information: Request URL (http://localhost:8083/hello), Request Method (GET), Status Code (200 OK), Remote Address ([::1]:8083), and Referrer Policy (strict-origin-when-cross-origin). Below this, the 'Response headers' section is visible, showing a 'Raw' button and a list of headers: Connection (keep-alive), Content-Length (13), Content-Type (text/html; charset=UTF-8), Date (Thu, 23 Jul 2026 17:34:44 GMT), and Keep-Alive (timeout=60).

Name	Headers	Preview	Response	Initiator	Timing
hello	▼ General Request URL: http://localhost:8083/hello Request Method: GET Status Code: 200 OK Remote Address: [::1]:8083 Referrer Policy: strict-origin-when-cross-origin ▼ Response headers Raw Connection: keep-alive Content-Length: 13 Content-Type: text/html; charset=UTF-8 Date: Thu, 23 Jul 2026 17:34:44 GMT Keep-Alive: timeout=60
